

# Elemica PAVE

## Procurement Automation Via Email

**Integrate suppliers without requiring them to have integration software! With Elemica PAVE, electronic purchase orders are automatically converted to email and routed to your suppliers.**

### Key Benefits

- Completely digitizes your buying process
- Provides complete, seamless integration with your ERP solution
- Increases efficiency by reducing paper, email, faxes, and phone calls
- Eliminates manual invoice entry
- Increases supplier participation in B2B initiatives
- Provides low barrier of entry for suppliers: no passwords, no costly integrations, and intuitive design
- Increases transparency and visibility with suppliers
- Creates ability to scale as needed

### Key Features

- Complete Order-to-Invoice capabilities
- Fully automated, ERP-integrated confirmations
- Cost-effective, low-impact supplier onboarding process
- Send attachments with purchase orders
- Print-friendly options

### Solution Overview

For small and midsize businesses (SMB), Elemica understands that on-boarding a supplier network can be a difficult and costly initiative. Many companies understand the benefits of automation but only see the business case for high volume suppliers that do an EDI connection. Most suppliers don't have the volume to warrant investing in a full connection.

With Elemica PAVE, electronic purchase orders are automatically converted to email and routed to your suppliers. Suppliers view orders as they do today, only now they can confirm directly through email. Confirmed orders are automatically routed back to the Buyer's ERP, resulting in: No costly integrations, rapid on-boarding and ability to scale as needed.
