

ROAD TRANSPORT EXECUTION

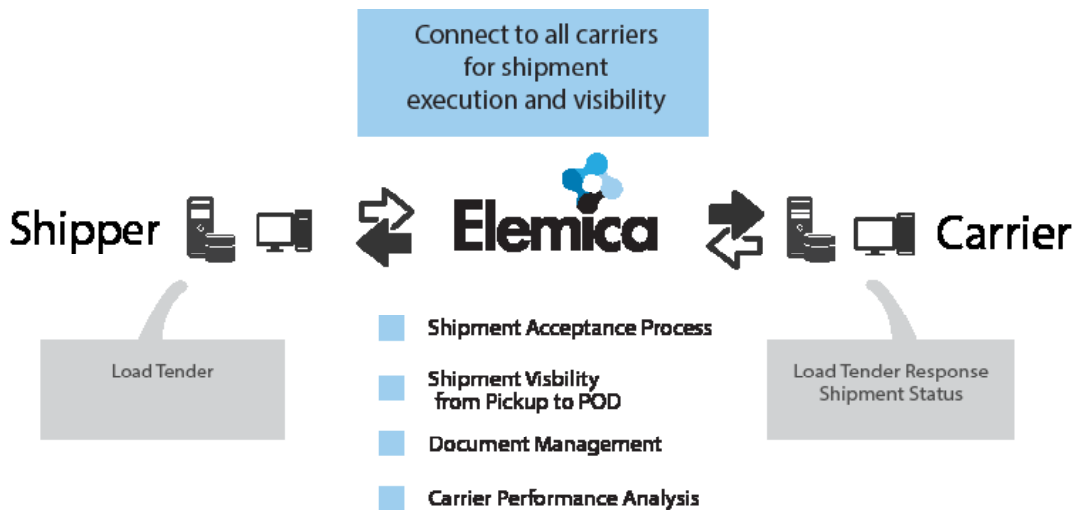

Elemica SmartLink Logistics Management Application

What would consistent and transparent delivery performance mean to your customers?

There are many coordination points in the process of moving materials through your supply chain, and all must work in harmony to achieve on-time delivery. By automating the execution of your road transportation shipments, you eliminate errors and rework, reduce administrative costs, and accurately track customer service metrics.

The largest industry-specific logistics collaboration network with cloud-based solutions for automating your road transport processes.

Benefits

- Increases accuracy and speeds fulfillment
- Lowers shipment expenses
- Eliminates inefficiencies and errors
- Reduces accounts payable time wasted on incorrect freight invoices
- Reduces premium freight by alerting to changes and response issues
- Higher operational efficiencies and utilization

Key Capabilities

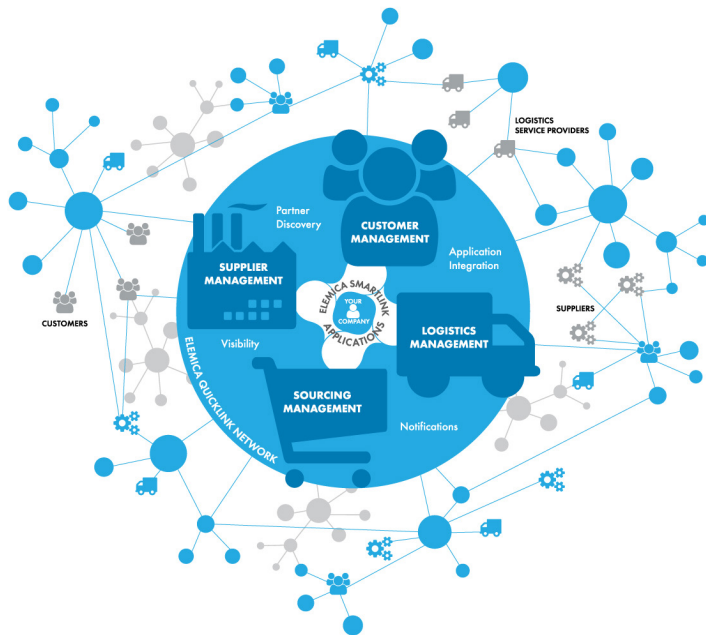

- Global supply chain and relationship management via a single application
- Notification of accessorial charges as they arise
- Less training required for individual shipper and carrier systems
- Alerts to monitor shipments and inventory events
- Shipment visibility for all supply chain participants

Elemica's Road Transport Execution solution removes communication and transactional barriers within your current processes. Our solution enables you and your Logistics Service Providers (LSP's) to communicate in the way that is most efficient for each of you.

Our "connect once, connect to all" approach improves the quality and speed of your transportation operations. Extra Cost Collaboration eliminates disputes in accessorial charges by allowing carriers to enter additional charges for shipments, and allowing you, as the shipper, to approve or reject them. By mapping carrier status messages to a set of standard shipment codes, you will be able to analyze and report on logistics and carrier performance. The document center allows you to upload all your shipping documents and associate them to individual shipments. Alerts enable you to manage by exception.

Logistics Management Solution Suite Overview

Elemica Logistics Management seamlessly connects you to all of your LSPs while providing standardized processes that deliver innovative capabilities:

Road Transport Execution:

Automate communication with road carriers, collaborate on accessorial charges and maintain visibility of shipment throughout life cycle.

Ocean Transport Execution:

Automate communication with ocean carriers, collaborate on BOL master data, and maintain visibility.

Time Slot Booking/Time Slot Optimization:

Collaborate with carriers for appointment scheduling to eliminate detention charges.

Terminal and Warehouse Visibility:

Connects shippers to their third-party warehousing providers.

Carrier Rate Management:

Maintain rates from time of award to expiration.

Freight Invoice Management:

Allow carriers to create freight invoices from pre-approved shipment cost elements.

Transforming the Way Your Company Does Business

As the leading Supply Chain Operating Network for the global process industries, our customers create and operate high performance supply chains with solutions at the heart of their business. Elemica drives bottom line business results by promoting reduced cost of operations, faster process execution, automation of key business processes, removal of transactional barriers, and seamless information flow between business partners. We transform supply chains by replacing manual and complex approaches with automated and reliable ones.
